Admission of Students

Admission:

The Deanship of Admission and Registration in the university is responsible for the admission process. Students can apply to the IS program through an on-line application process. The admission requirements are determined by the Deanship of Admission and Registration for each academic year. The requirements are as follows:

- 1.A student must have a high school certificate or an equivalent degree from within the Kingdom or from outside it.
- 2.A student must have a high school degree or equivalent for no more than five years, however, the University's Council may waive this condition if there are convincing reasons.
- 3.A student must have a good reputation and behavior.
- 4.A student must pass any test or personal interview that is requested by the University's Council.
- 5.A student is medically fit.
- 6.A student must have an approval from his/her work to study if he/she has a job.
- 7.A Student must meet any other conditions determined and announced by the University's Council at the time of submission.
- 8.A student is not terminated from another university for disciplinary reasons.
- 9.A student may not be a holder of a bachelor's degree or equivalent degree, and the university's Rector can dismiss this condition.
- 10.A student is not registered in another university degree.
- 11.A student must pass the university level science track in the general year program and get the grades required by the Council of IS department.

If a student satisfies all the above requirements, he/she will be accepted in the IS program. Each newly enrolled student is encouraged to meet his/her academic advisor and open a student file which should be kept and maintained by the academic advisor as a record. This file should reflect student progress mainly concerning on student's results.
